# France: a support system for agricultural technical education.

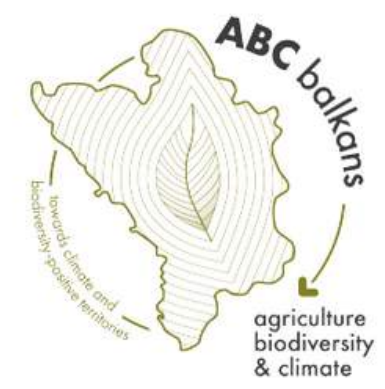

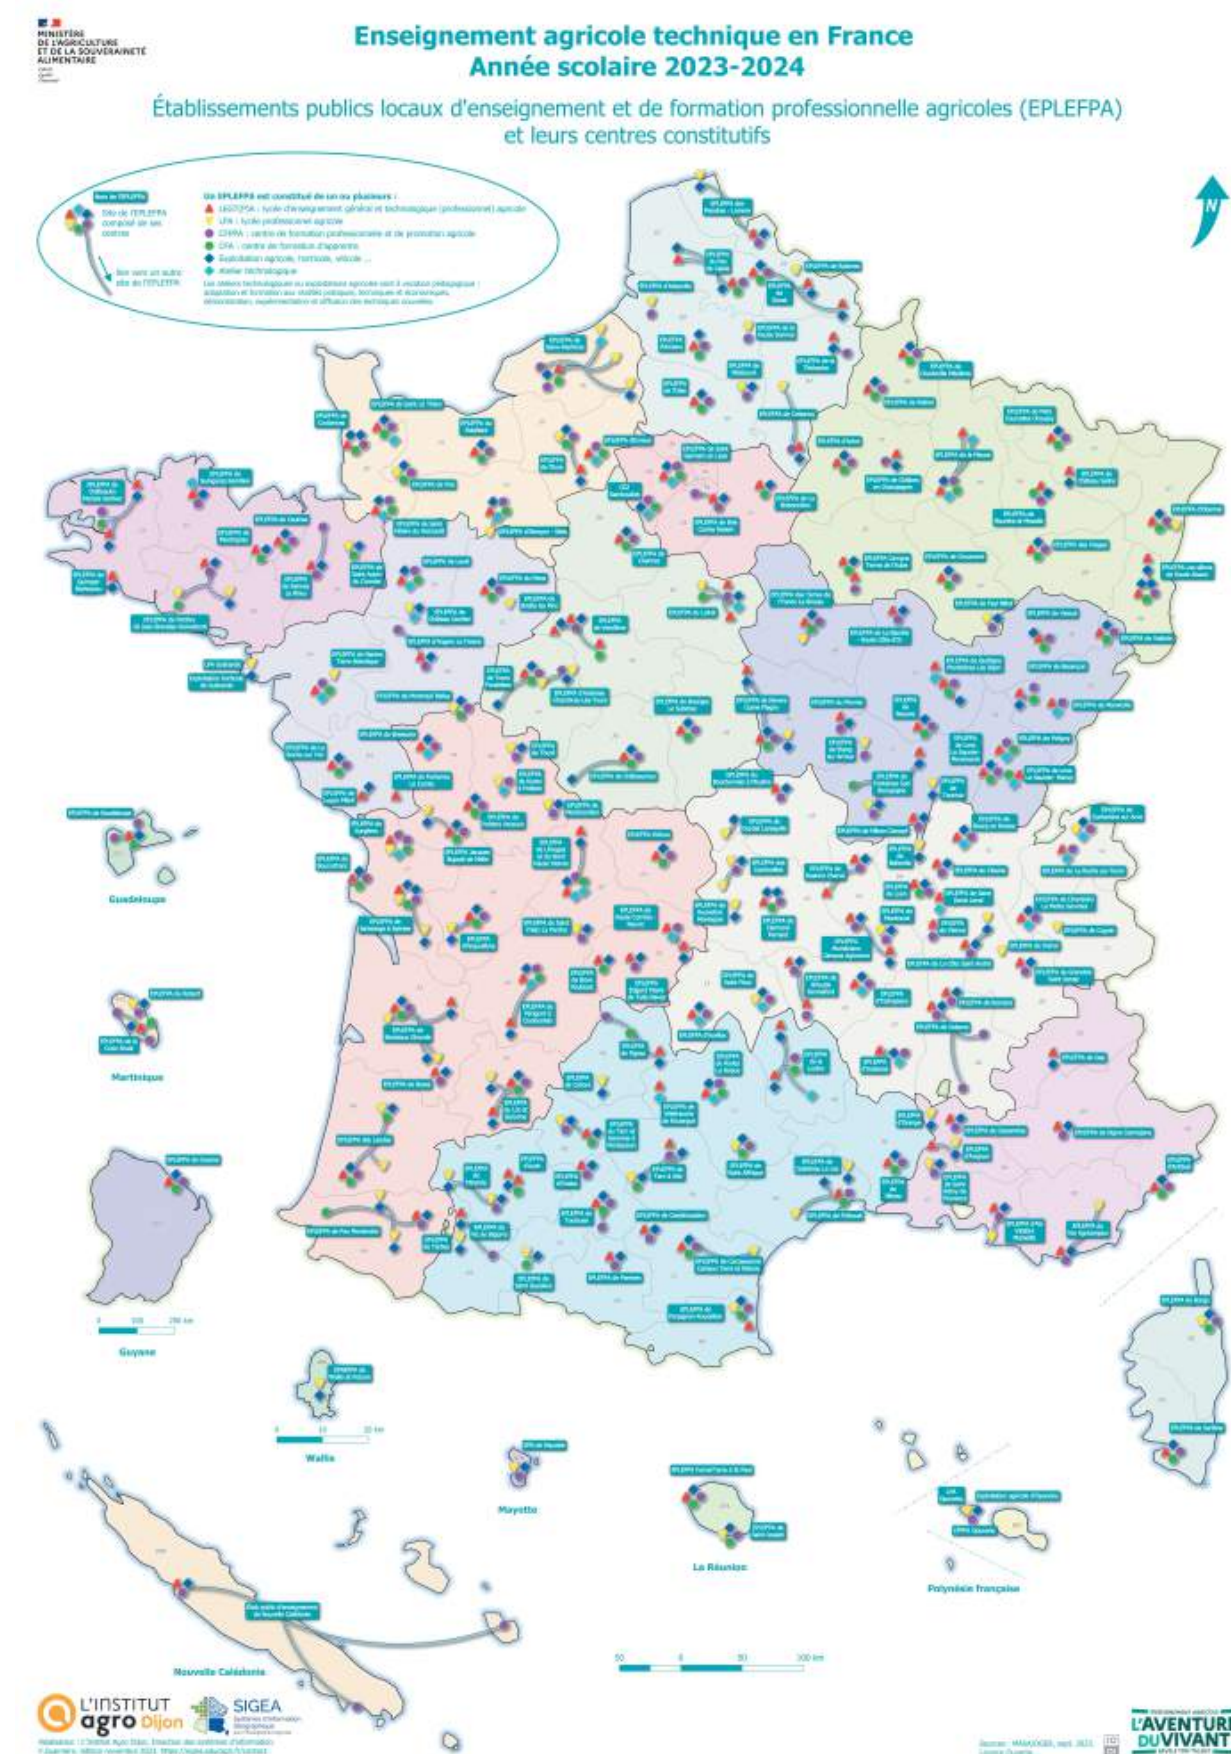

→ 5 national support institutions

→ provide technical support/educational support for technical agricultural education

→ make links between education and research, technical institutes, professionals and the ministry's guidelines

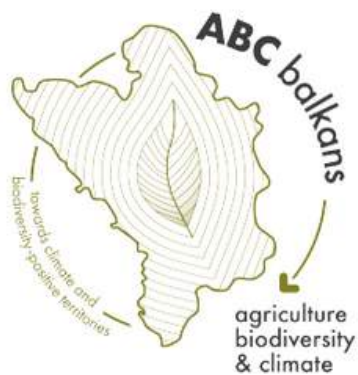

→ 217 public agricultural colleges

# *What is special about teaching pastoralism?*

**It's no longer a question of learning how to apply a recipe and calculate a ration !**

- understanding the **processes** and **functioning of ecosystems**
- learning to **observe, adjusting practices** to **adapt** to different situations
- **Incorporated know-how**: practical know-how, result from experience, confrontation with various situations

# One of our mission : creation of educational material

→ Production of self-confronted **videos** explaining the gestures and reflections mobilised by the farmers and shepherds in their work situation.

→ <https://idele.fr/pastorale/>

→ Pedagogical tools, serious games, etc.

→ Tools for gathering representations, tools for talking about controversial subjects

→ online at the end of 2024...

**>> Only in french  
and for french  
context !!**

# *Proposal for an erasmus projects*
